

Quick Start Guide

Remote Two

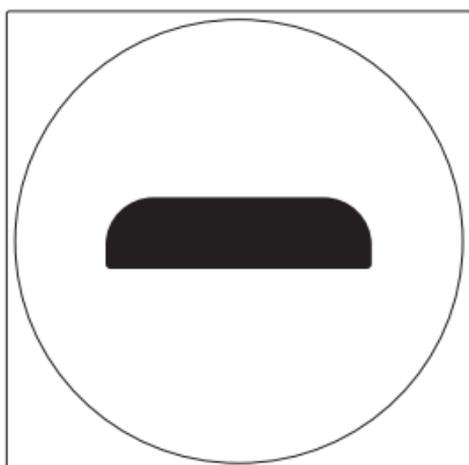

unfolded circle

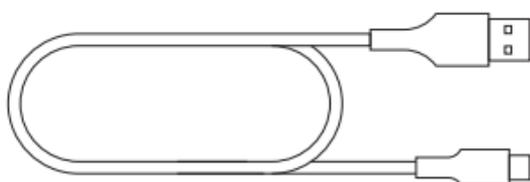

What's in the box?

Remote

Smart Charging Dock

USB-C to USB-A Cable

IR Extender Cable with 2 Emitters

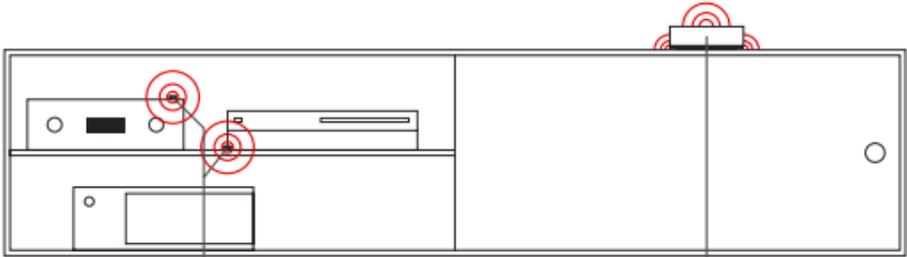

Initial setup

Press and hold the Power button for 2 seconds to turn on the remote and follow the instructions on the screen for initial setup.

Press and hold for 2 seconds to power on

Positioning the dock

IR Extenders

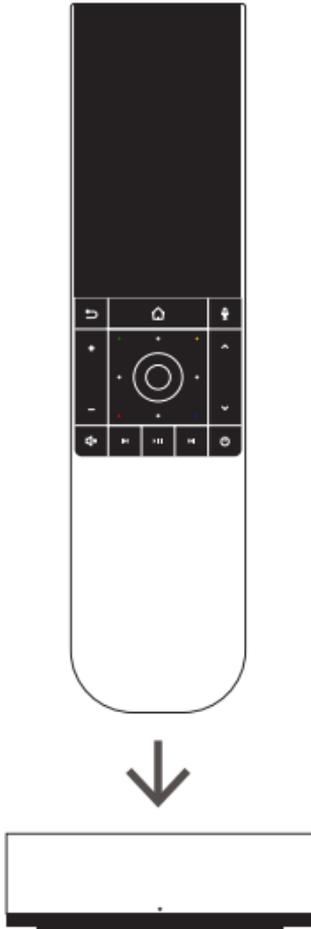

You can place the emitters inside the cabinet

Smart Charging Dock

Emits IR signals on the sides and top

Position your Smart Charging Dock so it has an unobstructed line of sight to the IR (infrared) devices you want to control. You can use the supplied IR extender to place the emitters inside your cabinet to reach devices behind closed doors.

Charging the remote

Place the remote in the dock to charge it. Internal magnets will guide the remote to the correct position. The status LED on the dock will light up in a breathing pattern to indicate the remote is charging.

Only use power supplies that meet the minimum requirements of the Smart Charging Dock.
